

Contributor Usability Study Sheet:

Purpose

To evaluate how easily a new user can create and place an AR information point with title and description.

Before Starting

Record:

Participant ID: C3 (Dual Degree Economics Students)

Location: Library side

Prior AR experience: No

Introduction

“Thank you for participating. I am testing an AR mobile application that allows users to attach information to physical locations. This is a test of the application, not of you. Please think aloud while using it and say what you expect, what seems confusing, and what you are trying to do.”

Pre-Task Questions

Ask:

1. “If you wanted to add useful or interesting information about this place, how would you expect this app to help you do that?”

Ans: Historical significance

2. "Do you think this task will be easy or difficult? Why?"

Ans: Difficult because i don't have any idea about AR at all

Contributor Task

"Please use the application to place an information point anywhere you want to tell something fun or anything like short story or your experiences"

Observation Checklist

Understood what contributor mode means: Yes

Understood indoor/outdoor choice: Yes

Understood when to wait before placing: Yes

Understood system feedback/readiness messages: Yes

Was able to place anchor successfully: Yes

Was able to enter title easily: Yes

Was able to enter description easily: Yes

Was able to save successfully: Yes

Needed moderator help: No

Where did difficulty occur?

Nowhere

Notable hesitation/confusion:

Nowhere

Task result: Success

Time taken: 17 mins

Post-Task Questions

1. "How easy or difficult was this task?"

Ans: It was super easy to use

2. "What part was most confusing?"

Ans: Nowhere the information helped but the big popup which shows lat/lng/alt and all were not understandable

3. "Did the experience match what you expected?"

Ans: Ohh Yea!

4. "What would you improve in this process?"

Ans: I will remove that box showing lat/lng and all

Quick Rating

Rate 1–5:

(5: Very Satisfied, 1: Very Dissatisfied)

The contributor workflow was easy to understand: 5

Placing the anchor was easy: 5

Entering title/description was easy: 5

The feedback messages were clear: 5

I would feel confident doing this again: 5

Researcher Summary After Session

Main issue:

Nowhere did everything smoothly

Main positive point:

Understood when to wait and when to place and behaved according to the feedback message like when it said “location too far, try moving closer” he moved and then tapped to place

Suggested improvement:

Removing the box which shows earth tracking and all
